Hereford Heifers

Rank these heifers as they would be selected as future donors in a reputable Hereford operation located in the Southeast. This firm has a rich history of producing show cattle that are competitive at the national level; but, the true measure of achievement is generating females that perform in the cow herd. A handful of bulls are marketed to other purebred breeders each year. Feed resources are abundant, however practical females should be able to calve unassisted.

Number	CE	BW	WW	YW	MM	REA	MARB	CHB$
