**Ingelvac PRRS® ATP**

**PRRS Vaccine**

**Description**

Ingelvac PRRS® ATP is a modified-live PRRS vaccine that is proven safe in pigs and non-pregnant gilts and sows in PRRS positive herds. It provides cross protection against heterologous challenges and has shown to significantly reduce reproductive failure and respiratory disease due to PRRS virus.

**Features**
- Developed from an isolated atypical PRRS parent strain.
- Safe in pigs and non-pregnant gilts or sows.
- Aids in the reduction of both reproductive and respiratory forms of the disease caused by PRRS virus.
- Proven cross-protection against heterologous challenges.

**Dosage & Administration**

Rehydrate the vaccine by adding the full contents of the accompanying liquid diluent to the vaccine vial. Shake well and use immediately. Rehydrate only with the diluent provided; do not mix with other materials.

- **Sows and Gilts:** Using aseptic technique, administer a single 2 mL dose intramuscularly at 3-4 weeks prior to breeding for the reproductive form of the PRRS virus.
- **Piglets:** Using aseptic technique, administer a single 2 mL dose intramuscularly to swine 3 weeks of age or older for the respiratory form of the disease. Administer the complete 2 mL dose to each pig vaccinated.

**Efficacy and Safety**

Efficacy and safety of the vaccine other than the dose rate prescribed on the label is unknown and therefore, not recommended and not USDA approved. Anaphylactic reactions may occur.

**Adverse Effects**

Anaphylactic reactions may occur.

---

**Noromycin 300 LA**

**Oxytetracycline Injection 300 mg/mL**

**Antibiotic**

Each mL contains 300 mg of oxytetracycline base as amphoteric oxytetracycline.

For the treatment of disease in beef cattle, non-lactating dairy cattle, calves, including pre-reibling (wean) calves and swine.

**Dosage:**

Oxytetracycline Injection

**Cattle:**

A single dosage of 5 milligrams of oxytetracycline per pound of bodyweight (0.2 mL/100 lb) administered intramuscularly or subcutaneously is recommended in the treatment of the following conditions:

1. Bacterial pneumonia caused by Pasteurella spp. (shivering fever) in cattle and calves, where treatment is impractical due to husbandry conditions, such as cattle or calf on, or where repeated restraint is inapplicable.
2. Infectious bovine keratoconjunctivitis (pink eye) caused by Mycoplasma bovis.

**Swine:**

A single dosage of 3 milligrams of oxytetracycline per pound of bodyweight (0.2 mL/100 lb) administered intramuscularly is recommended in the treatment of bacterial pneumonia caused by Pasteurella multocida in swine, where treatment is impractical due to husbandry conditions or where repeated restraint is inapplicable.

**Recommended Dose:**

Refer to package insert for complete indications, dosage, and usage.

**Storage:**

Store at room temperature 99°F - 106°F (3°C - 30°C).

**Keep from Freezing:**

**Net Contents:**

100 mL

**Manufacturer:**

Norbrook Laboratories, Ltd.

**Distributed by:**

Norbrook, Inc.

**Lot No.:**

05460601

**Batch No.:**

**Expiry:**

18/06/2019

**Made in:**

UK
INDICATIONS
For the treatment and control of gastrointestinal roundworms, lungworms, lice, and mange mites. See package insert for complete indications, precautions, warnings, residue warning, and use directions.

Do not contaminate water by direct application or by improper disposal of drug containers. Dispose of containers in an approved landfill or by incineration.

RECOMMENDED DOSE
Cattle: 1 mL per 110 lb body weight.
Swine: 1 mL per 75 lb body weight.

WARNING
Not for use in humans. Keep this and all drugs out of the reach of children.

RESIDUE WARNING: Do not treat cattle within 35 days of slaughter. Because a withdrawal time in milk has not been established, do not use in female dairy cattle of breeding age. A withdrawal period has not been established for this product in pre-ruminating calves. Do not use in calves to be processed for veal. Do not treat swine within 18 days of slaughter.

PRECAUTIONS: For subcutaneous injection in cattle and swine only. Use automatic syringe equipment only. Protect product from light. Restricted Drug (California) — use only as directed. Store at 20-25°C.

AGRI-MECTIN® (ivermectin)
Injection for Cattle and Swine
1% Sterile Solution

Consult your veterinarian for assistance in the diagnosis, treatment, and control of parasitism.
