

Contestant Number: _____ Name: _____

Fall SimAngus Heifers

Rank these heifers as they would be used as replacement heifers in a commercial cow/calf operation in the Shenandoah Valley. These females will be bred to SimAngus bulls via natural service and managed in a forage-based based production system where labor is minimal. This operation markets all male and non-replacement female progeny through the local auction market.

No.	CE	WW	YW	Milk	Stayability	API	TI
1	11.9	56.3	91.3	21.3	7.3	113.7	66.5
2	10.2	61.7	92.9	20.1	10.3	127.1	68.6
3	12.1	64.1	101.2	21.9	12.7	130.4	70.8
4	10.7	60.2	92.3	22.5	10.1	126.3	67.4
Breed Avg.	10.9	60.2	92.6	21.3	9.1	121.1	67.4

Mark your class placing on separate judging card. Hand in this sheet after answering the following questions

- _____ 1. Which heifer is the softest in her lower rib?
- _____ 2. Between heifers 2 and 4, which is longer hipped?
- _____ 3. Which heifer is the steepest out of her hip?
- _____ 4. Which heifer has the greatest probability of staying in the herd as a 6 year old cow?
- _____ 5. Which heifer would you expect to produce calves with the most carcass value?
